REGISTRATION OF VALVES AND FITTINGS

Manufacturer: PARKER HANNIFIN

The design(s) for the following Valves/Fittings has been received by us and has been examined and accepted for registration in the Province of Manitoba as follows.

CATALOGUE	CRN	FILE
FT SERIES 4135-CV DEC-2013	0E02206.24	35444

An invoice covering survey and registration fees is enclosed.

NOTE: CRN registered under reciprocal agreement & is conditional based on compliance with the notes set by the original issuing Jurisdiction: **ABSA**. See attached stamped "this is part of CRN" for scope of registration. This registration expires **April 7, 2025**.

This registration is valid until the indicated expiry date only if the Manufacturer maintains a valid quality management system approved by an acceptable third-party agency until that date. Should the approval of the quality management system lapse before the expiry date indicated above, this registration shall become void.

The registration of this design does not relieve the manufacturer, the owner or his agent of the responsibility for the design or construction of a fitting in accordance with the applicable Acts, Codes and Standards. Inspection and Technical Services assumes no responsibility by registering designs, examining plans and/or inspecting equipment or facility.

Yours truly,

Ryan Orlesky, C.E.T.

Design Surveyor

PRODUCT LOGO MARKING REQUIREMENTS ID-3

GENERAL:

The following information is adapted from Parker's Corporation Communications and Identification Manual.

PRODUCT IDENTIFICATION:

It is important that Parker identification appear on the millions of components sold into the market place each year. For this reason, special versions of the Corporate Signature have been designed to accommodate difficult product marking situations. The three key variables which will govern the selection of proper identification techniques are the material on which the marking is to be applied, the surface contour, and identification area size. The order of preference for product marking usage is shown. When possible, the solid Signature should be used down to a minimum of 5/8 inch. For smaller applications, the solid Open Signature, with slightly more open space within the letterforms, should be used. The Linear Signature and the Helvetica Light Parker are approved only for especially difficult marking conditions and hard material surfaces. When the marking surface, contour or area size makes it impractical to use the complete Parker identification, a "P" may be used in order of preference shown. Critical dimensions for product identification only are provided in this section.

November 12, 2014

The scope of this registration renewal is the FT Series Filter listed on pages 30 through 33 of Catalog 4135-CV, Check Valves, Filters & Relief Valves, dated December 2010. These are the same filters and materials as were covered by the existing registration. The design of these filters has not charged since the original registration. A change was made to previous catalog 4130-FT (October 2001). The contents of that catalog were incorporated in a consolidated line catalog (4135-CV) as listed above.

Fredrick Roy, P.E.
