

# SALES TIPS

## Industrial Valves

### Ball Valves

- Universal series
- Proven reliability thanks to a **long lasting sealing performance** due to wear-compensation seals around the ball
- **DVGW** series for **gaz** and water supply

### Needle Valves

Designed for applications requiring **precise manual flow adjustment**

### Butterfly Valves

Compact and suitable for **frequent operations** with very low torque level, representing an alternative to ball valves

### Axial Valves

Equipped with a **pneumatic or electro-pneumatic actuator** allowing a remote control
